- > EUR 103.4 mn build-up in working capital needs in H1 2016 was primarily driven by
 - > payments for restructuring
 - > increase in inventories across all subsidiaries and in accounts receivables (due to different dynamics at cut-off date)
 - > high income tax payments driven by Slovenia due to the EUR 30.0 mn positive extraordinary effect in other operating income in 2015)
- > Higher CAPEX paid for investments from previous periods such as the spectrum investments in Serbia in Q4 2015 and due to generally higher CAPEX in H1 2016 driven by Belarus in Q2 2016

* National and International EU/EEA MTRs stated as regulated. International MTRs differ between EU/EEA and non-EU/EEA originating country. Non-EU/EEA MTR for Croatia: 1,73kn/min -> 2,00Kn/min in Apr 2016

** Belarus values: peak times/off-peak times – the medium weighted MTR value amounts to BYN 0.022, 150 per minute

1 NRA currently reviews wholesale markets and cost accounting models. Outcome of analysis/proceedings can lead to (slight) MTR reductions in Q2/2016ff. CRC will publish on public consultations updated BU-LRIC models.

2 NRA analyses currently the market data to actualize the cost calculation model PURE-LRIC . First evaluation expected autumn 2016. In Austria due to near balanced national traffic little impact on EBIDTA expected even by further MTR rate erosion.
