Declining asset has caused a decrease in Wireline D&A; Wireless D&A was higher due to Mobiltel amortization of customer base (EUR 18.2 million)

Primarily due to write down of remaining goodwill of Czech On Line

Only slight increase of interest expenses despite higher net debt

Foreign exchange differences caused slight increase

Due to positive one time effect of group taxation and as increased taxable income could be offset by lower tax rate

Net Debt Increases but Remains well below the Communicated Thresholds

* CF from operations + CF from investing - Mobitel acquisition price - CAPEX; ** Mobitel cash purchase price of EUR 1,185.7 million + acquired net debt of EUR 504.9 million including EUR 70.4 million for UMTS licence and acquisition related cost; *** Shareholder remuneration includes EUR 117.8 million dividends and EUR 184.4 million share buybacks

Strong Shareholder Remuneration

- Total amount of EUR 248.5 million spent on share buybacks so far
- Management proposes dividend of EUR 0.55 per share
- Dividend per share increases by 129%

Outlook

Outlook for 2006 Reflects Further Growth – No Material Impact from Adoption of IFRS Expected

Group

- Revenue growth of about 5% and increase of adjusted EBITDA of about 10%; net income rises by around 20%
- Constant pay-out ratio of 65%
- Increase of Capex due to consolidation of Mobiltel and 3G investments
- Strong cash flow allows reduction in net debt and continuation of share buyback program

Wireline

- Continuing migration of call volumes to mobile will lead to decline in revenues and adjusted EBITDA; strong growth in broadband area will not fully offset decline in voice business

Wireless

- Further rise in revenues and adjusted EBITDA from 12 month contribution of Mobiltel; increasing contribution from international operations, tough price competition in all markets

Appendix

Regulatory Issues

Key Aspects

- Definition, analysis and remedies for all telecommunication markets completed. The overall scope of intervention has not materially changed. Update of Market Analysis started.
- Reduction of monthly charges for ULL between Telekom Austria and Tele2/UTA by 1.83 % to EUR 10.70 per fully unbundled line and EUR 8.29 for sub loop unbundling and adjustments of the pricing for collocation sites.
- Regulator approves Telekom Austria's leased line offer and considers it to be non-discriminating.
- Due to a decision of the Administrative Court the PAC (payphone access charge) will be negotiated on a contractual basis in the future.
- Mobitel termination rates: The long run perspective of the Regulator is to have reciprocal termination rates on the level of the most efficient mobile network provider in Austria (= L-RAIC-level). All mobile operators are required to lower their termination rates from January 1, 2006, by EURc 1 every six months (Hutchison 3G by EURc 1.83) until each of them reaches the L-RAIC level of EURc 6.79.
