Restructuring - Explanatory Information

- > The following factors have to be taken in account when comparing “FTEs Addressed” to “Provisioned FTEs”:
 - > FTEs of social plans may include receivers of one-time payments such as golden handshakes and can fluctuate due to retirement
 - > Number of staff released from work may fluctuate due to permanent reactivation, acceptance of social plans, transfer to government or retirement
- > In 2009, the following effects were noticeable:
 - > “FTE Effect” of EUR -10.0 mn as income from a reduction of staff released from work outweighed expense for number of new social plans
 - > This was overcompensated by interest rate adjustments and resulted in a total restructuring charge of EUR 17.5 mn
 - > Social plans included a significant number of FTEs accepting one-time payments
- > Previously communicated FTE numbers for 2008 and 2009 were adapted to a unified accounting view
