# Outlook 2001

# Outlook

## Fixed line

Costs savings deliver the basis for expected growth in earnings and margins; further tariff reductions to reduce market share losses

## Mobile

Market saturation in Austria and continuing strong growth in Croatia lead to slightly higher margins; slowing down earnings growth rates

## Data

Steady growth in revenues, but lower earnings due to higher transfer prices charged by the fixed line segment

## Internet

Repositioning continues with the transfer of business customers from the fixed line segment and the launch of the new portal in June. Strong investment to strengthen market position expected to lead to higher marketing costs
