All figures are stated according to IAS 18 if not stated otherwise. To reflect the performance on an operational basis, the proforma figures present comparison figures for previous periods as if M&A transactions executed between the start of the comparison period and the end of the reporting period had already been fully consolidated in the relevant months of the comparison period. Alternative performance measures are used to describe the operational performance. Please therefore also refer to the financial information presented in the Consolidated Financial Statements, which do not contain proforma figures, as well as the reconciliation tables provided in the Earnings Release.

Key financial developments for the first half and second quarter 2018

Q2 2018: Sound operational trends continued with strong EBITDA contribution from CEE markets

Group (in EUR million)	Reported Q2 2018	Proforma Q2 2017	% change
Total revenues	1,099.3	1,084.7	1.3%
EBITDA	356.4	359.7	-0.9%
CAPEX	168.1	171.5	-2.0%

- Group total revenues increased by 1.3% on a proforma basis, mainly driven by higher equipment revenues and solid retail fixed-line performance. All markets show growing service revenues in local FX except for Slovenia.
- Decline in EBITDA of 0.9% but slight increase (+0.2%) on an adjusted* basis with strong contributions from CEE markets compensating for A1 Digital investments.
 - Additionally, the strong comparison period Q2 2017 was also positively impacted by project-driven revenues as well as reversal of accruals and positive effects on the equipment margin in Austria.**

*Adjusted figures exclude one-off and FX effects as well as restructuring charges

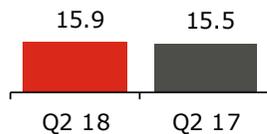

**These factors are not considered in the adjusted performance.

- One-off effects: EUR +2.4 mn (Q2 2017: EUR +0.4 mn) in revenues and EUR +2.9 mn (Q2 2017: EUR +0.4 mn) in EBITDA
- FX effects: Negative EUR 12.7 mn and EUR 6.7 mn in revenues and EBITDA respectively in Q2 2018
- Restructuring charges: EUR 0.1 mn in Q2 2018 (EUR 0.2 mn in Q2 2017)

Austria: Solid operational performance driven by retail fixed-line; EBITDA almost stable despite strong comparable Q2 2017

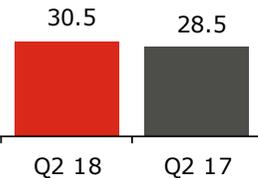

ARPU (in EUR)

Δ: +2.9%

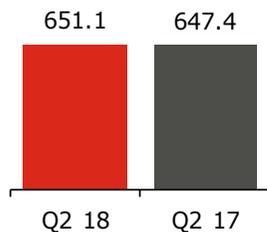

ARPL (in EUR)

Δ: +7.2%

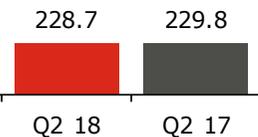

Total revenues (in EUR mn)

Δ: +0.6%

EBITDA (in EUR mn)

Δ: -0.5%

Operational data

- Postpaid subscriber base grew by 3.0% driven by ongoing high demand for mobile WiFi routers and high-value tariffs
- ARPU also rose due to mobile WiFi routers and increased high-value customer share despite the drag from roaming
- Higher ARPL due to fixed-line price increase in August 2017 as well as strong demand for higher bandwidth and TV options
- 2.1% RGU decrease mostly driven by voice; broadband RGUs year-on-year lower almost entirely driven by the price increase

Financial performance

- Total revenues increased, driven by growth in retail fixed-line and retail mobile service revenues offsetting lower fixed-line interconnection
- OPEX increased, mainly driven by equipment costs which rose due to more expensive handsets and higher quantities as well as product-related costs like commissions
- Subsidies per handset were increased to use market opportunities and prevent churn; total subsidies increased also due to higher quantities
- EBITDA slightly declined by 0.5%, due to the positive impact from project-driven revenues and reversals of accruals in Q2 2017 as well as higher subsidies in Q2 2018

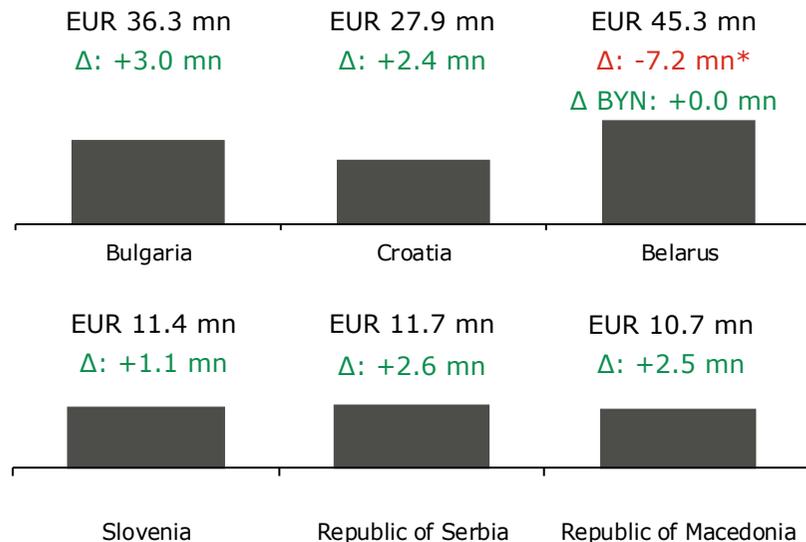

Results for the first half and second quarter 2018

Higher equipment revenues and solid service revenue trends in most CEE countries, negative FX impact in Belarus

EBITDA

(proforma, in EUR mn)

* Proforma view including M&A impact in EBITDA in Q2 2017 of EUR 0.3 mn in Belarus

Highlights CEE

Bulgaria:

- Equipment and fixed-line service revenue growth, mobile service revenues rose slightly
- EBITDA rose as higher sales force costs were more than outweighed by higher revenues

Croatia:

- Rising mobile service revenues driven by strong demand for mobile WiFi routers; growth also in fixed-line service revenues
- Strong EBITDA also supported by lower bad debts

Belarus:

- Local currency revenues benefit from rising equipment revenues and fixed-line revenues
- Higher costs due to FX denominated cost positions like frequency fees led to lower EBITDA
- FX-impact: EUR 15.6 mn on revenues and EUR 7.3 mn on EBITDA

Other segments:

- Ongoing strong competition in mobile while fixed-line business is stable in Slovenia, EBITDA higher due to positive non-operative impact in equipment margin
- In Serbia EBITDA continues to profit from strong service revenue trends
- EBITDA margin expansion from 29.4% to 35.9% in Macedonia

Operational improvement, less interest and CAPEX paid led to strong growth in free cash flow

- 1-6 M 2018 free cash flow increased by 35.4% y-o-y, driven by
 - lower interest paid due to bond repayments and the use of favourable refinancing
 - lower capital expenditures paid y-o-y mainly driven by less investments in the first half of 2018
 - better operational performance
- Changes in working capital and other financial positions of EUR 101.7 mn (EUR 123.8 mn in 1-6 M 2017) stemming from
 - EUR 34.0 mn increase in accounts receivable
