Appendix

Regulatory Issues – Key Aspects (1)

Amendments to the Austrian Telecommunications Act: On July 16, 2009 amendments to the Austrian Telecommunications Act entered into force with the goal to stimulate innovation and investment in infrastructure.

Next Generation Networks: The European Commission has launched its 2nd public consultation on the regulatory treatment of next generation access in June 09. Previous guidelines of the Commission have partly contradicted the terms adopted by the European Parliament for the next legal framework on the subject of investments.

Review of the Regulatory Electronic Communication Framework: The legislative process of the new regulatory framework remains subject to further negotiations between representatives of the EU institutions in September 09.

Fixed Net Termination Rates: In August 2009, the national regulatory authority mandated an increase of the mobile-to-fixed termination rates between Hutchison Austria and Telekom Austria. After final validity of this decision, the local termination rates will be increased by 29% (local) and by 19% (regional), national termination rates will be slightly reduced by 5%.

Mobile termination rates: The national regulatory authority has published the finale gliding path as of mid of June 09, which reduces MTR to 2,01c/min by June 1, 2011. The gliding path started on July 1, 2009 with an initial value of 4,00c/min and foresees cuts in MTR of about 0,50c/min every six months.

Regulatory Issues – Key Aspects (2)

International roaming charges: on July 1, 2009 the extension of the existing roaming regulation entered into force. The regulation includes:

- Extension of the voice roaming regulation at both wholesale and retail level due to expire in July 2012.
- Per-second billing both at wholesale and retail level, except for an initial charging period of 30 seconds both at retail and wholesale level.
- Wholesale and retail price caps for SMS. Wholesale cap at 4 Cents, retail cap at 11 Cents.
- Introduction of transparency measures for data roaming: By March 1, 2010 customers should be able to specify a “cut-off limit” for their outstanding data roaming charges expressed either in volume or currency.
- Introduction of a wholesale gliding path for data roaming services of EUR 1 by July 1, 2009, EUR 0.8 by July 1, 2010 and EUR 0.5 by July 1, 2011.

Sales Tax Croatia: At the end of July 2009 the Croatian Parliament passed an act which introduces a monthly tax on mobile operators’ services (effective date: August 1, 2009). According to the act, the mobile operators are obliged to pay a monthly fee of 6% on revenues from SMS, MMS and voice services.

Sales Tax Republic of Serbia: As of June 1, 2009, mobile telephony service users have to pay an additional 10% tax in the Republic of Serbia. This tax refers to SMS, MMS, voice services, data transfers (internet traffic) as well as special services and is collected on behalf of the state by all three operators in the territory of the Republic of Serbia.
